

FALLBACK BOARD — top 180 by VBD

Tool dead: cross off names ESPN shows taken, take the highest VBD left that fits your caps (**QB2 / RB6 / WR6 / TE2** — tighter than the league's QB3/TE3, on purpose), and do not stack a bye. **D/ST never before pick 152, K never before 161. Eff** is the keeper-depleted pick a player is expected to go at — compare it to your picks 8, 17, 32, 41, 56, 65, 80, 89, 104, 113, 128, 137. **Known stale:** Tank Dell shows his pre-drop projection; treat him as a late dart, not by this rank. Regenerate with **py make_fallback.py** after any board change.

DO NOT DRAFT — removed from this board since the last printing:
Josh Jacobs — NFL Commissioner's Exempt List, out indefinitely (NBC Sports / DraftSharks, Aug 30 2026). Consensus guidance is to draft
