

LATE RB SHEET — picks 104 / 113 / 128 / 137

Behind is the man he would have to replace. **The job** is how far apart ESPN projects the top two backs on that team, computed on the SOURCE pull so keepers still count. **UNSETTLED** under 60 — ESPN does not know who wins it, which is exactly the backfield worth a dart. **contested** 60-150. **LEAD BACK** over 150 — the starter owns it, so this is a pure handcuff that only pays on an injury. **Job worth** is what ESPN projects for the man holding it, i.e. roughly what the winner inherits. The team RB pie barely varies (317-355 across the league), so the gap, not the pie, is the whole signal.

From pick 104 only, and only on a near-tie. 80% of picks in this range finish below replacement and none in three years became a league-winner. Lottery tickets on a job, not a plan for one — take 3 or 4. A hit is also a **+80 to +95 keeper** for 2027.
