

# Override Card — what the board says vs what ESPN now says

JUG, slot 8 · built Sep 07 2026, 12:59 · board = the shipped `board_v8_fixed.csv` · pull = `espn_projections_2026_20260907_1258.csv`

**Why this sheet exists.** The Sept board-order test returned **REBUILD**, and **there is nothing to run**: doc 62 confirmed the shipped board has **no builder** — no script produces it, and the one called "the board builder" is hardcoded to an August pull and writes a file that was deleted as a trap. Doc 62's standing answer is **Option A: draft off the verified board and handle the news as overrides at the pick**. This is that list.

**How to use it:** the board is still the one list you draft from. If a name below comes up, read the NEW rank, not the board's. **Amber rows are the exception** — a news override is already on the board and the pull is trying to undo it. Ignore the pull on those.

**VBD baseline:** \$4.1 replacement (QB 341.6 · RB 168.6 · WR 163.5 · TE 140.3), recomputed from the new projection so both ranks sit on one scale. The board's own ADP is already current — only the projections below are stale.

| PLAYER                                                                                                                                                                              | TM  | POS | ADP | BOARD RANK | NOW | BOARD PROJ | NOW | MOVE |
